

PHOENIX

A Phoenix Trellis is our beautifully designed open frame canopy system that provides sun and rain protection with optional in-fill panels. This trellis gives any building an ultra-modern look. With a powder coated finish and all aluminum construction, there are many ways to configure this product. A Phoenix Trellis is easy to install and can be field fitted if necessary. Phoenix systems are available with an 8", 10" and 12" flat or open channel face. **Made in the U.S.A.**

BLOCKING EXAMPLE

BRICK WITH INSULATION OVER WOOD BLOCKING

E.F.I.S. OVER CMU BLOCK WALL
